### Support a Special Program for Art, Music, and Sport

\$4,950

Art, Music and Sport are all crucial elements necessary for any child's natural development, great ways to stimulate the brain, as well as being a key component when it comes to aiding and preventing mental health issues. For less than \$10 per student per year, the planned program would allow us to integrate all three of these elements into our curriculum, covering the costs of all art materials, equipment and the regular rental of the nearby sports facilities located only 300m from our center.
