

Provide Unlimited Clean Water

Diseases from dirty water kill more people every year than all forms of violence, including war. Children under-five are on average more than 20 times more likely to die from illnesses linked to unsafe water and bad sanitation than from conflict.

PLF's water towers deliver a reliable source of drinking water where it's needed most. Each tower uses ceramic filtration systems that remove contaminants such as viruses, parasites, and E. coli, all commonly found in rural water sources.

To keep these systems running, we replace 40 filters each year at a cost of \$22 per filter, and cover \$15 per month in fuel for the water pumps at three sites.

Clean water changes everything.

\$2000 ensures every child can drink, wash, and learn in health and safety, 365 days a year!
