

First Aid Supplies

Scraped knees and stubbed toes are a part of growing up, but at PLF locations, a little care goes a long way. Each school has trained staff ready to provide basic first aid, helping prevent small cuts and bumps from turning into bigger problems.

Our team was trained by volunteer medical professionals who also helped us stock our kits with all the essentials: bandages, eye drops, gentian violet, paracetamol, soap, and even toothbrushes and toothpaste. With these simple supplies, students stay cleaner, healthier, and ready to learn.

Since starting these wellness programs, we've seen a big drop in infections from minor injuries, and a big boost in our students' confidence to care for themselves.

\$415 keeps our first aid shelves fully stocked for the year
