

Provide Soap for 1000 Students

Soap is a simple but vital tool for children's health, especially for those living in remote communities where it's rarely available at home. Partnering with EcoSoap, an NGO that recycles unused hotel soap into new bars for just \$0.20 each, PLF ensures that every child has access to soap every day.

We currently supply nine locations, where students are able to wash their hands before and after meals, helping to prevent the spread of illness and reinforce lifelong hygiene habits.

It takes 6,000 bars of soap each year to keep this daily routine going, at a total annual cost of just \$1,200.
