

School Supplies For High Schoolers

As students move into high school, the cost of education grows. With more advanced subjects come longer supply lists, and for many families already stretched thin, the price of notebooks, pens, and resources can quickly become out of reach.

PLF's school supplies program makes sure every student is equipped with the tools they need to stay engaged and on track. These supplies are simple but powerful stepping stones toward graduation and beyond.

High school marks the turning point between school and university. Having the right materials not only supports their studies today but helps prepare them for the academic challenges of tomorrow.

Just \$12.06 buys all the supplies a highschooler needs for one year.

\$16,510 supports 1369 High Schoolers
