

Make A Difference

A School Playground

Description

Providing safe outdoor play spaces in every school is a consistent priority for BFT — but without dedicated funding, it isn't always possible. Your gift makes it happen. For \$2,600, we build a complete outdoor playground — swings, slides, monkey bars, seesaws, a spinner, climbing structures, and balance trails — set safely on 10 inches of sand. Around 270 students use it every break time, after school, and on weekends. Teachers and students maintain it together, building a culture of shared ownership that keeps the space thriving for years.

Your Impact

Around 75% of students use the playground regularly — and the results go well beyond physical activity. Schools where playgrounds are introduced see approximately 25% improvement in student attendance: children who find joy and belonging at school come more often and stay enrolled longer. The playground also builds the social skills that don't come from textbooks — cooperation, communication, resilience — that carry directly into adult working life and community participation. Teachers notice the difference in the classroom too: children who play together work together better. Because students and staff jointly care for the equipment, the playground becomes a lesson in shared community responsibility that will outlast any individual child's school years.

Costing

Item	Cost
Play Equipment & Materials	\$2,300
Site Preparation	\$200
Installation & Labour	\$100
TOTAL	\$2,600
